

The Search for Significance – Description

By Robert S. McGee

We have two alternatives: We can base our self-worth on our success and ability to please others, or we can base our self-worth on the love, forgiveness, and acceptance of Christ.

Robert S. McGee is a professional counselor and lecturer who has helped thousands of people experience the love and acceptance of Jesus Christ. He is also the founder and President of Rapha, a nationally recognized health care organization that provides in-hospital and intensive outpatient psychiatric treatment programs with a Christ-centered therapeutic perspective.

The truths presented in *The Search for Significance* form the four foundational cornerstones that bring together the balance of clinical and spiritual therapy that are combined in the Rapha treatment program.

These insights are both profoundly Biblical and clearly applicable. The Rapha treatment centers deal with psychiatric and substance abuse problems for both adults and adolescents at locations throughout the United States.
